

**1.1. effeff 13105RR electric strike**

fail locked version,  
especially stable version,  
suitable for flush mounting in fire doors  
and fire barriers,  
resistance to break-up: 15000 N  
with monitoring contact (door open / closed),  
contact type: potential-free exchange,  
reliable unlocking under pre-load  
to 250 N,  
with protection diode,  
for access code systems,  
nominal voltage: 12 V DC,  
current consumption: 285 mA DC,  
nominal resistance: 42 Ohm,  
100% continuous duty,  
without striking plate,  
specification of doorhandedness required

order-no. (DIN left): effeff 13105RR-----E34

order-no. (DIN right): effeff 13105RR-----E35
